**Please find below and/or attached an Office communication concerning this application or proceeding.**

The time period for reply, if any, is set in the attached communication.

### Office Action Summary

**Application No.**

10/595,145

**Applicant(s)**

EKSTROM ET AL.

**Examiner**

PETER CHENG

**Art Unit**

2416

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 03 May 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 1-7 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-7 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
  2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

**Attachment(s)**

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☒ Information Disclosure Statement(s) (PTO/SF/ICE)  
Paper No(s)/Mail Date \_\_\_\_\_
- 4) ☐ Interview Summary (PTO-413)  
Paper No(s)/Mail Date \_\_\_\_\_
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: \_\_\_\_\_

## DETAILED ACTION

### *Claim Objections*

1. Claims 2, 5 and 6 are objected to because of the following informalities: Claim 2 recites "... from the database indication that ..."; Claim 5 recites "means for connect ..."; and Claim 6 recites "...from the database indication that ...". There instances appear to be typographical errors. Appropriate correction is required.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. **Claims 5-7 and 1-4** are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 6,097,798 to Albers et al.

4. **As to Claim 5**, Albers discloses an arrangement to monitor media session flow in a telecommunication network comprising a media-handling node (Fig. 1, "Arlington 5ESS" node, whose details are further disclosed in Fig. 2 and col. 8, lines 41-48 and col. 10, lines 15-39, disclosing a "media handling node") through which, sessions between subscribers (Fig. 1, subscriber "126 684-1111" and subscriber "target 112 222-1111") are transported via first ports and second ports (Fig. 2, "interface module 51", comprising "units 0 ... n" and col. 10, lines 15-19 and 27-39, disclosing that such "units 1 ... n", i.e., first ports and second ports, "terminate lines from subscriber stations", thus

disclosing sessions between subscribers are transported via units 1 ... n, i.e., first ports and second ports) comprising:

means for assigning an extra port to the media handling node for each new session that is transported through the node (col. 10, lines 26-58, disclosing that in each "5ess" switch, i.e., the media handling node, there are interface modules 51 that each comprise a "unit 0" port that connect to an enforcement agency terminal; col. 8 lines 50-58 further discloses that each such "5ess" switch, i.e., the media handling node, comprises a "time-multiplexed switch 57", which together with "TSI" of each interface module 51 "selectively connects the interface units in call connections", i.e., the "time-multiplexed switch 57" and the TSI in each interface module collectively disclose means for assigning an extra port to the media handling node for each new session that is transported through the node);

means (col. 11, lines 14-18 and Fig. 2, "CALEA module processor" in combination with "DATA STORE 58", disclosing means for storing in a database; also Fig. 1, "service control point scp" and "lrm db" and col. 8, lines 10-16, disclosing a database of "local numbers" for rerouting a call to be monitored) for storing in a database (col. 8, lines 23-26, disclosing a "table of target directory numbers" for surveillance in the CALEA module, thus disclosing database), identification of a first subscriber for which monitoring is desired (col. 8, lines 23-26, disclosing a "table of target directory numbers" for surveillance in the CALEA module, thus disclosing database);

means for setting up a connection between the first subscriber and a second subscriber (col. 8, lines 41-46, disclosing the "Arlington 5ESS", i.e., the media handling node, "routes the call to the target telephone 112"; col. 8 lines 50-58 further discloses that each such "5ess" switch, i.e., the media handling node, comprises a "time-multiplexed switch 57", which together with "TSI" of each interface module 51 "selectively connects the interface units in call connections"; thus the "time multiplexed switch 57" and the "TSI" together disclose means for setting up a connection between the first subscriber and a second subscriber);

means for connect an assigned extra port that is adherent to the session between the first and second subscriber (Fig. 2, "calea module processor", "data store 58 and "program store 56", col. 8, lines 23-26 and col. 11, lines 14-18, disclosing a CALEA module that decides what level of surveillance to apply to a session; col. 8, lines 41-48, disclosing the "Arlington 5ESS" switch, i.e., the media handling node, performing surveillance on the session between the first and second subscribers; col. 10, lines 27-39, disclosing performing surveillance at the 5ESS switch by "half-tapping" into a call/session via the extra port "unit 0" in each interface module 51; thus all of the above discloses means for connect an assigned extra port that is adherent to the session between the first and second subscriber) and;

means (Fig. 1, "Arlington 5ESS" terminal, whose details are further disclosed in Fig. 2) for monitoring the session between the first and second subscriber via the connected extra port (col. 8, lines 41-49; col. 10, lines 27-39; Fig. 1, disclosing an "FBI" agency terminal attached to the "Arlington 5ESS" media handling node, and disclosing

performing surveillance, i.e., "monitoring", at the 5ESS switch by "half-tapping" into a call/session via the extra port "unit 0" in each interface module 51).

5. **As to Claim 6**, please note that Albers discloses the arrangement as in the parent claim 5.

Albers further discloses further comprising means for sending an indicator from the database indication that the extra port is to be connected (col. 11, lines 13-31 and Fig. 2, "calea module processor 54" and "data store 54", "administrative module 55", "communications module 53" and "interface module 51", all disclosing the "calea module processor" determining and sending an indicator to the interface module 51 indicating that the extra port "unit 0" is to be used for surveillance/monitoring, i.e., is to be connected).

6. **As to Claim 7**, please note that Albers discloses the arrangement as in the parent claim 5.

Albers further discloses further comprising means for setting up a three-part conference (col. 8, lines 41-48, disclosing the "Arlington 5ess" switch, i.e., the media handling node, setting up a three-part conference between subscriber "126 684-1111", subscriber "target 112 222-1111" and "FBI" between the two involved subscribers (Fig. 1, subscriber "126 684-1111" and subscriber "target 112 222-1111") and a monitoring facility (Fig. 1, "FBI").

7. **As to Claim 1**, please see rejection for Claim 5, which recites the same limitations.

8. **As to Claim 2**, please see rejection for Claim 6, which recites the same limitations.
9. **As to Claim 3**, please note that Albers discloses the arrangement as in the parent claim 2.

Albers further discloses whereby the indicator (col. 8, lines 34-38, "tcap message" sent by the scp to the Arlington 5ess switch, which causes the 5ess switch to begin surveillance of the session, i.e., indicator to connect extra port and begin monitoring session) is sent from the database to the media-handling node (col. 8, lines 34-38, "tcap message is sent from the scp, i.e., the "database", to the Arlington 5ess switch, i.e., the media handling node).

10. **As to Claim 4**, please see rejection for Claim 7, which recites the same limitations.

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to PETER CHENG whose telephone number is (571)272-9021. The examiner can normally be reached on M-Th, 8:00AM - 5:00PM (EST).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Derrick W. Ferris can be reached on (571)272-3123. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
